

Algorithmic Composition CipherTune is handy and reliable application which provides users with the possibility of encrypting texts or photos and converting them to MIDI files. Moreover, the tool allows users to adjust the text format for encryption, set preferred passwords and choose from several available instruments. The application is installed on the user's computer with easy-to-use interface and doesn't require the use of additional Java or other software. If you are a MIDI musician and you need to protect your work from unauthorized access or you have a need to keep it secret, you should give Algorithmic Composition CipherTune a try. Search for:

What's New In?
